TECHNICAL DATA SHEET

Lightweight Blast Suits

Description: -

Comfortable outer clothing for abrasive blast operators and for non-blast personnel working at the blast site, for protection from abrasive rebound Country of Origin Pakistan.

Purpose:-

To protect the blast operator from the impact of rebounding abrasive and provide ease of movement

Advantages:-

1. Nylon panels protect arms and legs, while durable cotton back allows suit to breathe Enhancing comfort
2. Straps at cuffs adjust to fit — help keep out dust and abrasive
3. Lighter weight than all-leather or all rubber suits
4. Optional Long Gloves protect hands

Seasonal Lightweight Blast Suit

Purpose:-

The Soft Pak seasonal blast suit protects the operator from the impact of rebounding abrasive during warm weather or when blasting indoors. The suit is a cost-effective alternative to a heavy-duty suit for intermittent or short-term blasting, and for non-blast personnel working at the blast site.

Advantages:-

1. Weighs less and costs less than Soft Pak's heavy-duty blast suit.
2. Nylon and cotton construction is easily machined washable.
3. Rain forced knee panels for longer wear.
4. Discarding the lightweight suit after a toxic dust job is more economical.
5. For rental outlets, the low-cost suit makes it possible to stock suits in sizes to fit most customers.
6. Available in a broad range of sizes from small up to 4XL.
