

Walnut Shell

POLISHING GRIT - WALNUT SHELL

INTRODUCTION

Walnut Shell abrasives is hard and fibrous abrasives made from crushed walnut shells in accordance with industrial standards. These product is well known for their excellent durability and elasticity and used widely in grinding and polish processes.

PROPERTY

Specific Gravity: 1.28

Hardness [Moh's] : 2.5 -3.0

Water Content: 8.7%

Fat Content: 0.4 %

CHARACTERISTICS

1.0 Walnut Shell abrasives are suitable for grinding and polishing without leaving scratches which lead to oxidation. 2.0 A variety of different effects can be obtained using different grain sizes. 3.0 Walnut Shell abrasives have a lower cost than similar abrasives made from other materials. 4.0 With Walnut Shell abrasives, there is no danger of silicosis or other occupational diseases developing. 5.0 Walnut Shell abrasives are easy to handle.

Walnut Shell

USEFULNESS

1.0 GRINDING, POLISHING - SHOT BLAST

- a) Deburring of products made from hardening resins such as Urea, Phenol and Epoxy.
- b) Deburring of semiconductors and other electronic devices.
- c) Deburring of Zinc, Aluminium, Tin and other soft metals.
- d) Removing residual foreign matter from castings, etc., and removing rust, paint, carbon and other adhering substances.
- e) Surface finishing of firebrick.

2.0 GRINDING, POLISHING - BARREL FINISHING

- a) Polishing and burnishing of eyeglass frames, watch cases, etc.
- b) Polishing and processing of buttons, glass, rinsing fixtures, screws, etc.
- c) Deburring of Zinc, Aluminum, Tin and other soft metals.
- d) Dressing of skins.

3.0 OTHERS

- a) Manufacturing of grinding wheels.
- b) Filter materials [strainers in septic tanks]
- c) Adhesives and fillers for resin molded products etc.

Available size #5, #10, # 20, # 36, #40, # 60, # 100, # 120, # 180
